

CAPSTONE MANAGEMENT AND PLAGIARISM CHECKER

Capstone Project Pitch Proposal

Group Members / Authors / Team

1st Semester – AY 2025 – 2026

Problem Statement

- Universities struggle with managing student capstone projects effectively. Current systems lack integration, making it difficult for supervisors to track progress, evaluate work, and detect academic dishonesty.

Proposed Solution

- An integrated platform combining capstone project management with advanced plagiarism detection using machine learning algorithms to analyze document similarity in real time.

Unique Contribution / Innovation

- Real-time plagiarism detection with contextual analysis. Integration of project management and academic integrity tools. AI-powered similarity scoring.

Target Users / Beneficiaries

- Capstone students, advisers, and academic integrity officers.

Expected Impact / Value

- Improve academic integrity by 90%. Reduce manual review time by 70%.
Enable supervisors to manage 50% more capstone projects.
